1 General

DigiTi, stands for "Digital Timesheet", in German, **digital wage hour recording**. The tool is intended to facilitate the billing process for BASF and contractors.

DigiTi - Effizienzsteigerung im Gesamtprozess

 Zeitersparnis an der Schnittstelle zwischen Kontraktor und BASF

■ Limitierung von Fehlern und Folgeaufwendungen

 Vor-Ort Eingabemöglichkeit durch Nutzung von mobilen Endgeräten (Tablet & Smartphone*) "Hinweis: Ex-Schutz Zonen bitte nur mit Ex-Schutz Geräten befreten

 Aufwandsreduktion durch Datenübernahme nach Avisor

 Transparenz durch Datenbank und Berichtsfunktionalität

External

The digital performance records replace the previously existing paper form.

The introduction of DigiTi affects all companies / trades that have used the previous paper form "Services according to time spent" of BASF SE for the accounting of wage hours.

Only daily performance records are covered with DigiTi. Weekly or monthly submissions are not possible.

The performance records are only used for billing services that cannot be remunerated on the basis of service items, supplements, free texts or individual calculations. It must be completed in full every working day and have it recognised promptly.

External

2 Technical requirements for (mobile) use

DigiTi is a web-based application and works from any device if:

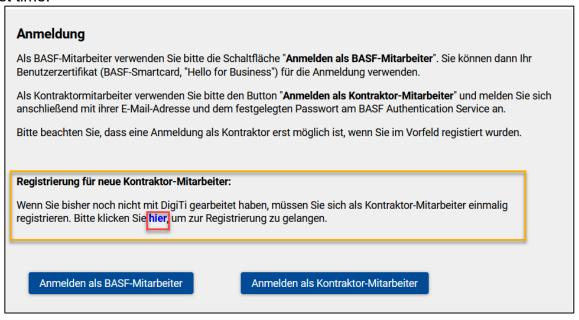

- An internet connection is available and
- The credentials for access are known.

Do not use DigiTi in two different browsers from one PC at the same time, this can lead to problems.

All major browsers (Edge, Chrome, Firefox) are supported.

2.1 Registration

On the home page (https://digiti.basf.com), registration must be made before logging in for the first time:

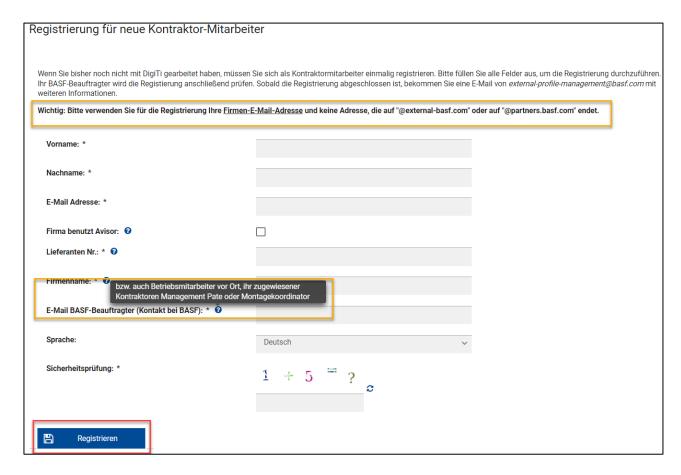

Fill in the fields and confirm your entry with "Register".

Important:

Please use your <u>company e-mail address for registration</u> and not an address ending in <u>"@external-basf.com" or "@partners.basf.com".</u>

External

If the BASF contact has approved the registration, a registration link will be sent to the contractor e-mail address provided. A password must be assigned in order for the registration to be completed.

External

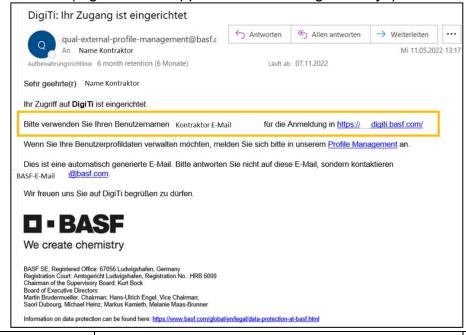

Registration link is valid for 28 days.

Please check if necessary. Your SPAM filter to accept emails from external-profile-manage-ment@basf.com .

After assigning a password, a final e-mail will be sent.

If you haven't received an email for a new password, it's because you already have a 3IAM account and password (e.g. for other applications or through SecSys).

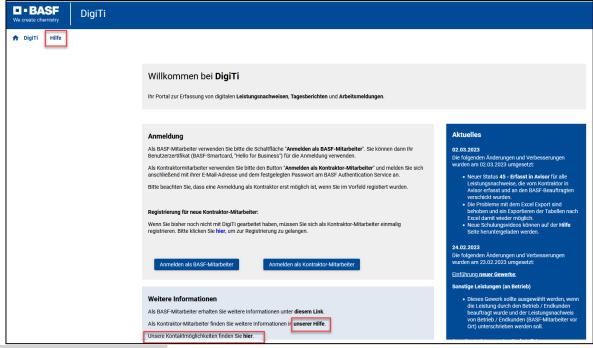

External

DigiTi can now be used with this access. Log in as a contractor employee under the start page:

Further information such as FAQ's can also be found on the page.

Help and further information in this chapter.

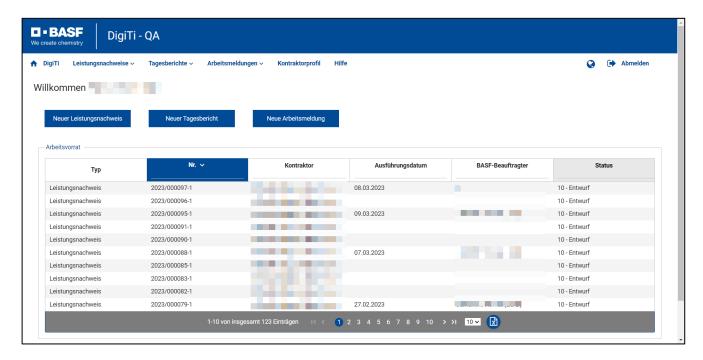

External

3 Basics of operation for contractors

3.1 Open the application as a contractor

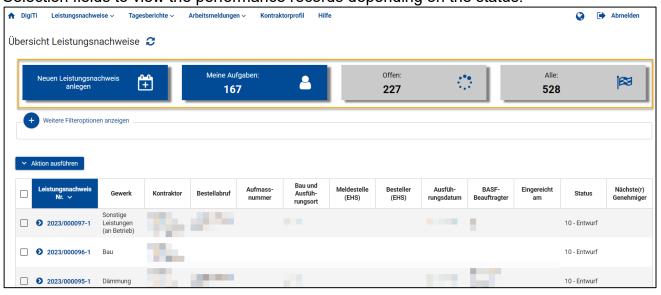

Home in DigiTi

View of the currently assigned, uncompleted performance records.

4 Overview of Certificates of Achievement

Selection fields to view the performance records depending on the status.

External

The selected view is highlighted in blue.

Info text appears before selecting the desired view.

Under "My tasks" you will find all currently assigned, uncompleted performance records.

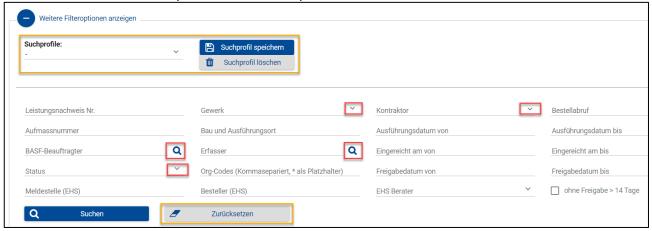

Under "Open" are all uncompleted performance records.

Under "AII" are all existing performance records.

4.1 Filter options

There are several filter options to sort the performance records.

Under Filter Options, several filters can be activated by pressing the "Search" button and deleted by clicking "Reset".

When searching for order call-off, measurement number and construction / execution location, you can search with * as a placeholder.

<u>Tip</u>: if a performance record is not found, make sure that no filter is set active.

It could also be that you have set filters, but e.g. do not see this appearance in the "My tasks" view, but perhaps in the "All" view.

You can actively save your own search profiles. Enter the desired search criteria and click on "Save search profile".

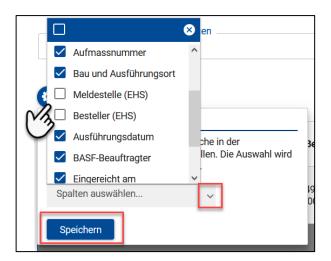

External

4.2 Setting columns manually

The columns of the overview table can obe customized via Custom.

Select or deselect columns and save entries.

The headings of the table of performance records can be sorted.

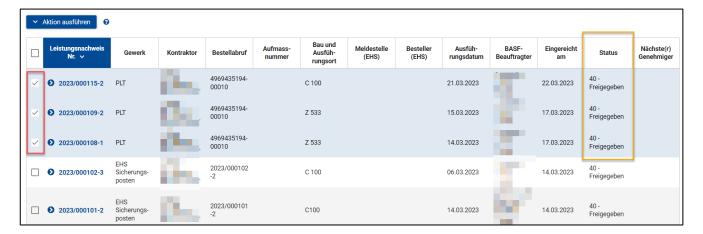

Active filter is highlighted in blue.

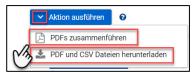

4.3 Merge and download transcripts of records (PDF)

With "Execute Action" several selected performance records (in the status Released), summarized in a PDF or a ZIP file (PDF & CSV) can be downloaded.

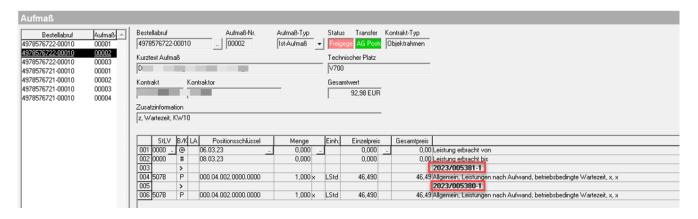

External

Summarizing PDFs works for all performance records that have been released since 24.02.2023.

If multiple records are attached in a PDF for billing in Avisor, make sure that all DigiTi ID numbers in Avisor are listed for the measurement.

Or written in one line in a row.

002		>							2023/000115-2; 2023/000109-2; 2023/000108-2
003	508B	Р	000.04.001.0000.0000	1,000	7,000	×	LStd	43,000	301,00 Allgemein, Leistungen nach Aufwand, Zeitaufwand, x, x
004	508B	Р	000.04.001.0000.0000	1,000	15,500	×	LStd	43,000	666,50 Allgemein, Leistungen nach Aufwand, Zeitaufwand, x, x
005	508B	Р	000.04.001.0000.0000	1,000	1,000	×	LStd	43,000	43,00 Allgemein, Leistungen nach Aufwand, Zeitaufwand, x, x

External

4.4 Create Reports

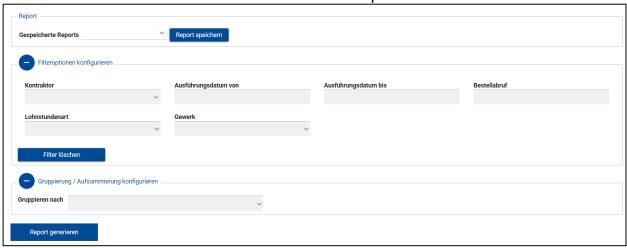

Under the tab "Records" there is now the possibility to display "Reports".

Here you can configure and save your report.

Under "Configure filter options", select which performance records or which data are to be used for the report (e.g. filters for a certain period of time, certain types of pay-hours).

Under "Configure grouping/summation", select according to which key figures the hours are to be summed. These are also the columns in the report.

You can use the Save Report button to save the selected filters and groupings.

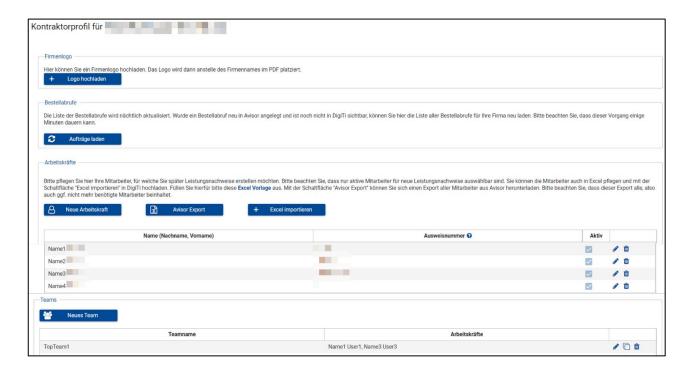

5 Maintain/edit contractor profile

The contractor must enter his employees before the performance records are created.

External

5.1 Insert company logo

Search for and open the company logo file under "Upload logo".

View the transcript of records with and without logo:

5.2 Order call-offs

The list of order call-offs is updated nightly. If an order call-off has been newly created in Avisor and is not yet visible in DigiTi, you can reload the list of all order call-offs for your company here. Please note that this process may take a few minutes.

External

5.3 Workforce

Please maintain your employees here, which you would like to create later in the performance record. These workers have no rights to edit anything in the DigiTi. This can only be done by the contractor officer.

Please note that only active employees can be selected for new performance records.

Employees can be added under "New Employee"

The first name, last name and BASF

ID number are required here.

<u>Important:</u> Enter the <u>identical ID number</u> as in <u>Avisor</u>. By "Save", the

employee is added to the list of workers and is "Active".

If the worker is only employed temporarily, you can edit the "Active" status by selecting the pen and unchecking the box. This means that the worker can no longer be selected for performance assessments.

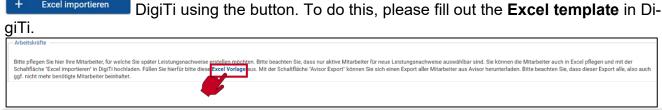

The worker can be unloaded via the bucket. <u>Be careful</u>, when the bucket is selected, the worker is deleted directly.

For the initial care of your workforce, we recommend two options:

1) Via "Avisor Export" you can download an export of all employees from Avisor. Please note that this export includes all employees, including employees who may no longer be needed.

You can clean up this list and + Excel importieren upload it to DigiTi.

You can also maintain all your employees in Excel and upload them to

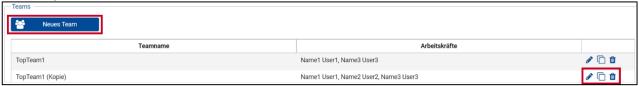

5.4 Teams

External

Groups of workers can be created under "Teams". These can be inserted more quickly in the transcript of records.

To create a new team:

Enter the team name, select the worker and add it to the team via the field on the right.

Add all workers from the left panel to the team.

- Remove a selected team member from the team.
- remove all team members.

At the end of the creation "Save".

✓ The pen can be used to edit an existing team. This □ copies the team and creates itself at the bottom of the list under Teams. The □ bucket is used to extinguish the team. Be careful, when the bucket is selected, the team is deleted directly.

Example when creating the performance record: Quickly enter several workers in the performance record.

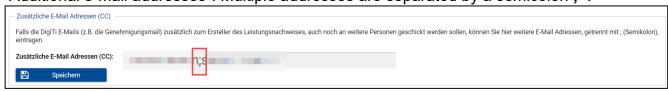

Use the "Add team" button to select the desired team. By dialing in, the workers who are stored in this team are created in the performance record.

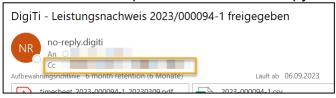

External

5.5 Add additional e-mail recipients

If the status of the submitted transcript of records changes, only the "submitter" will be informed by e-mail. If other employees are to receive this information, they can be entered under "Additional e-mail addresses". Multiple addresses are separated by a semicolon;

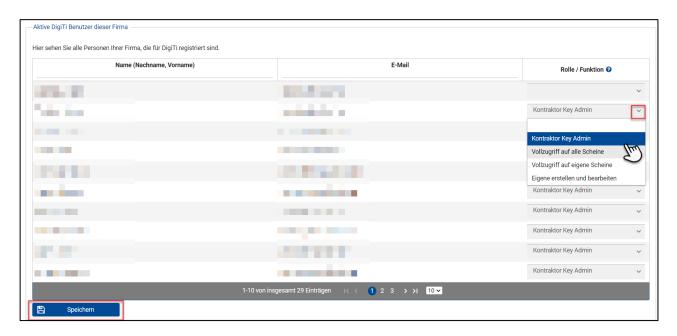

The additional recipients will receive a copy of the e-mails (cc)

5.6 Role of active users

Here you can see all registered users of the company and what role or permissions the user has.

Each newly registered user automatically receives the role "Contractor Key Admin". He can only be assigned another role by a user with the role "Contractor Key Admin".

Roles at a glance:

Revision: 1.7	Status: 19.04.23	File: DigiTi Handbuch Kontraktoren_EN.docx	Side: 17 from 59
---------------	-------------------------	--	------------------

External

Kontraktor Key Admin: • Pflegt das gesamte Kontraktorprofil • Pflegt Mitarbeiter/Arbeitskräfte im Kontraktorprofil • Pflegt Mitarbeiter/Arbeitskräfte Teams • Alle Scheine erstellen, bearbeiten, einreichen und unterschreiben Vollzugriff auf alle Scheine: • Pflegt Mitarbeiter/Arbeitskräfte im Kontraktorprofil • Pflegt Mitarbeiter/Arbeitskräfte Teams • Alle Scheine erstellen, bearbeiten, einreichen und unterschreiben Vollzugriff auf eigene Scheine: • Pflegt Mitarbeiter/Arbeitskräfte im Kontraktorenprofil • Pflegt Mitarbeiter/Arbeitskräfte Teams · Eigene Scheine erstellen, bearbeiten, einreichen und unterschreiben · Zugriff auf alle Entwürfe Eigene erstellen und bearbeiten: · Eigene Scheine erstellen und bearbeiten

5.7 Subcontractor employees

Subcontractors can be created for the company if the subcontractor has registered. The e-mail of the subcontractor can be entered here.

The subcontractors only see the performance records that the subcontractor has created himself.

External

6 Create a new transcript of records

On the home page, there are two ways to create a new transcript of records.

Either a new performance record can be created here or via the menu item 'Performance records' at the top of the view.

Below that, there are more views under "Overview of performance records"

6.1 General

All fields that must be filled in, i.e. mandatory fields, are marked with an asterisk *. An error message appears if a mandatory field has been forgotten.

An automatic save function (every 10 seconds) can be activated.

Text fields with a \odot have an info text about this field. The magnifying glass \bigcirc can be used to search.

6.2 Header

cti-			

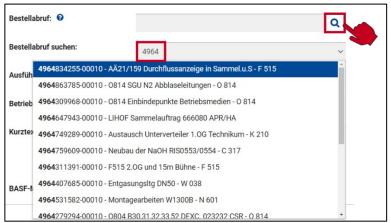

6.2.1 Order retrieval

The Q order call-off number can be searched for in the notification.

Revision: 1.7	Status: 19.04.23	File: DigiTi Handbuch Kontraktoren_EN.docx	Side: 20 from 59

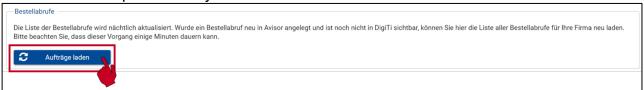

External

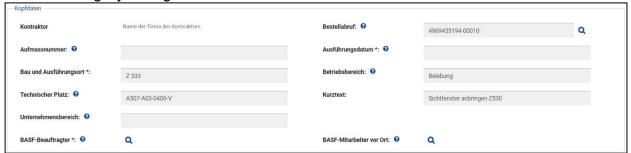

The more numbers of the order call-off are known, the smaller the selection.

Order call-offs are synchronized nightly. You could load them manually under the "Contractor Profile" tab. This process may take a few minutes.

Texts with a gray background were retrieved and inserted from the order call-off from Avisor.

The order call-off number must be stored at the latest before release. Otherwise, the proof of performance cannot be approved by the BASF representative.

The BASF employee has the option of entering the order call-off number in the submitted proof of performance. This is only possible in the Order call-off field.

If the employee on site approves the release of the slip without an order call-off number, the DigiTi-ID slip number is automatically created in the field of the order call-off.

External

6.2.2 BASF employees on site

On-site staff can Q be selected via.

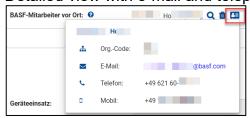

The more you enter in the search, the fewer people are displayed for selection.

1) If contact has already been selected once, it can be contact".

- 2) Enter known data
- 3) Press "Search".
- 4) Select the right user.
- 5) Use "Selection" to insert the person.

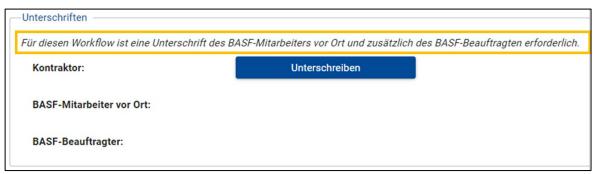

Detailed view with e-mail and telephone numbers possible at ...

By selecting an employee on site, the "workflow" under signatures also changes. Please discuss the signature process with your BASF representative in advance.

External

The definition can be found under the info text.

BASF-Mitarbeiter vor Ort: 2

BASF-Mitarbeiter vor Ort bestätigt, dass der Auftrag ausgeführt wurde bzw. die Anwesenheit (zum Beispiel Verursacher, Kunde, Betrieb, Betreiber, BASF-Beauftragter, Produktionsmeister Technik (PMT), Meister, etc.)

BASF-Mitarbeiter vor Ort: *

One and the same person could be entered in the fields "BASF employee on site" and "BASF representative".

6.2.3 BASF Representative

BASF representative can Q be selected via.

The more you enter in the search, the fewer people are displayed for selection.

1) If contact has already been selected once, it can be selected once, it can be selected once.

- 2) Enter known data
- 3) Press "Search".
- 4) Select the right user.
- 5) Use "Selection" to insert the person.

Detailed view with e-mail and telephone numbers possible

External

BASF representative is named in the order call-off. The definition can be found under the info text.

BASF-Beauftragter *: 0

BASF-Beauftragte sind vom Leiter der beauftragenden Einheit nach dem gültigen Delegationsprinzip benannte Mitarbeiter der BASF, die berechtigt sind, Aufträge zu erteilen, die Ausführung zu überwachen, Leistungen abzunehmen und Aufmaße und Leistungsnachweise nach deren Prüfung technisch freizugeben.

If the BASF representative is absent and a representative has activated, you can see this by the icon **.

One and the same person could be entered in the fields "BASF employee on site" and "BASF representative".

6.3 Trade-specific inputs

This view may vary depending on the selection of the trade.

All mandatory fields are marked with an asterisk *.

Service description (manda-	Brief description of the service provided so that the BASF
tory)	representative can approve accordingly. You have 4000
	characters at your disposal. You also have the option to at-
	tach attachments under file attachments.

Via a mobile device (e.g. mobile phone) you could use the "Record text" function. To do this, you have to type into the input field, then hold down the microphone on the keyboard and speak. At the end, press again in the input field where the text is to be inserted.

6.3.1 Insulation trade

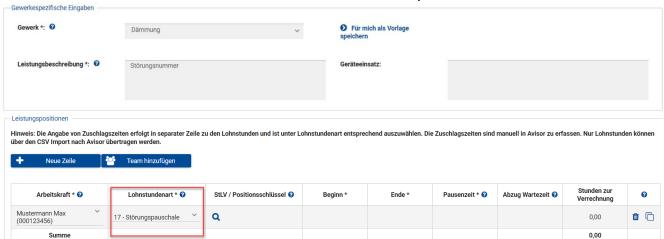

External

Form for lump sum for faults (only for the insulation trade!):

In order to save another piece of paper, the lump sum for disruption (which is used in the event of operational disruptions) can now be selected under "Service items" in the "Wage hour type" field for the insulation trade.

The fault number must be entered under the service description.

Work lists, such as the following, <u>do not</u> have to be stamped or signed by the company again.

External

These can be filled out and attached under the attachment in the DigiTi.

Please add the DigiTi ID to the file name of the attachments (e.g. 2022_001234-1_meinAnhang.xls).

See chapters: Attachments.

6.3.2 Selection of trades

The trade can be saved as a template for the user at . • Für mich als Vorlage speichern Thus, this does not always have to be reselected. It can be changed at any time.

Please check that you have selected the correct trade!

The following selection has the supposedly same view with fields to be filled in, but in the further process sometimes differently required signatures for the release (more under <u>Signature process</u> (workflow) depending on the selection of the trade in addition):

Construction

Insulation

Elevating work platforms

Corrosion protection

PLT

Heavy-duty assembly

Other services (to operation)

Other services (at a specialist office)

VT

Carpentry/shoring

Currently, a trade can be selected from 15 selection fields.

External

The view corresponds to the paper form of the trades with the respective lines in the performance record.

E.g. in the trade "EHS Consultant / Safety Shop":

E.g. in the trade "EHS security post":

If surcharge < 4h is selected, it is not possible to select the field for surcharges in gas analysis, and vice versa.

If Surcharge is described in Gas Analysis, the Surcharge < 4h field cannot be selected.

E.g. in the "scaffolding" trade:

Revision: 1	.7 Status: 19.04.23	File: DigiTi Handbuch Kontraktoren_EN.docx	Side: 27 from 59
-------------	----------------------------	--	------------------

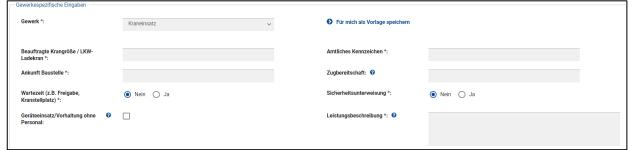

External

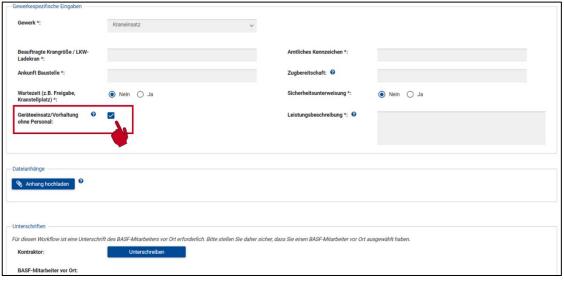

E.g. in the trade "Big Turnarounds VT":

E.g. in the "crane operation" trade

If the field "Equipment use/provision without personnel" is selected, the field of service items is hidden.

External

6.3.3 Signature process (workflow) depending on the selection of the trade

Each trade has an agreed signature process. This is to be discussed with the BASF representative.

Which signatures are to be made is displayed in the signature field, depending on the selection in the header data:E.g. trade VT or PCT selected and employee on site has been entered.

The following are the processes / "workflows" that are stored in DigiTi:

Trade	1. Signature	2. Signature		
Construction	Always BASF Representative	1		
Scaffolding	BASF employees are always on site	1		
Heavy-duty assembly	BASF employees are always on site	1		
Carpentry/shoring	BASF employees are always on site	1		
Elevating work platforms	BASF employees are always on site	1		
Crane operation	BASF employees are always on site	1		
EHS Consultant / Safety Shop	BASF employees are always on site	1		
EHS Backup Posts	BASF employees are always on site	1		
Corrosion protection	(a) In case of waiting times: BASF employee on site(b) otherwise: BASF representative	(a) In case of waiting periods: BASF representative		
Insulation	(a) In the event of waiting periods or if BASF employees are registered on site: BASF employees on site (b) otherwise: BASF representative	(a) In the event of waiting times or if BASF employees are registered on site: BASF representative		
VT	(a) In the event of waiting periods or if BASF employees are registered on site: BASF employees on site (b) otherwise: BASF representative	(a) In the event of waiting times or if BASF employees are registered on site: BASF representative		
PLT	(a) In the event of waiting periods or if BASF employees are registered on site: BASF employees on site (b) otherwise: BASF representative	(a) In the event of waiting times or if BASF employees are registered on site: BASF representative		

External

Big turnarounds VT	(a) If BASF employees are registered on site: BASF employees on site(b) otherwise: BASF representative	(a) If BASF employees are registered on site: BASF representative(b) otherwise: no 2nd signature
Other services (at a specialist office)	Always BASF Representative	1
Other services (to company)	BASF employees are always on site	1

Reminders are automatically sent by the system (Monday – Friday on weekdays) after 24 – 48 – 72 hours. After 96 hours, the contractor receives information that the approval period, the period for countersignature by the BASF employee, has expired. This gives the contractor the opportunity to inquire about the status of the processing or to enter another BASF employee.

The following reminder functions are stored for specific trades:

Trade	Dunning 1st signature (working days Mon-Fri)	Dunning 2. Signature	Complaint (back to the con)
Scaffolding	Mail 1 after 24 hours to BASF employees on siteMail 2 after 48 hours to BASF employees on siteMail 3 after 72 hours to representatives (if available, otherwise again to BASF employees on site)		After 96 hours back to contractor (60- approval time expired)

6.3.3.1 Signature process for the trade "Construction" and "Other services (at a specialist office)"

Koncontractor creates digital proof of performance on a PC or on a mobile device.

BASF representative confirms that the order has been executed or the presence of the contractor, on a mobile device by signature or from his e-mail.

6.3.3.2 Signature process for the trades: "EHS consultant / safety shop, EHS safety post, scaffolding, crane use, carpentry/shoring, aerial work platforms, heavy assembly and other services (to operation)"

Koncontractor creates digital proof of performance on a PC or on a mobile device.

BASF employee on site confirms that the order has been executed or the presence of the contractor, on a mobile device by signature or from his e-mail.

Revision: 1.7	Status: 19.04.23	File: DigiTi Handbuch Kontraktoren_EN.docx	Side: 32 from 59

Option 2):

Koncontractor creates digital proof of performance on a PC or on a mobile device.

BASF representative must directly check and approve the proof of performance or reject / reject it with justification.

The BASF employee on site or the BASF representative will receive two reminders or his representative will also receive a reminder within 72 hours. After 96 hours after submission, the certificate will be returned to the contractor with the status "Approval time expired". The contractor can now select another employee on site. In this regard, please consult with

The contractor can now select another employee on site. In this regard, please consult with the company to see who can confirm the proof of performance.

6.4 Power Items

In the case of performance positions, the workforce is associated with the hours, etc. entered.

External

6.4.1 Manpower

The "Worker" field <u>must</u> be completed in order for the transcript of records to be submitted.

Creates a field under Worker in which the individual worker can be selected.

Worker can be found more quickly by typing in the search field.

The names in the list are sorted alphabetically by first name.

Teams that have already been created can be viewed under can be selected. See chapters: *Teams*.

Arbeitskraft * 🔞

Q

6.4.2 Hourly wage type

The types of wage hours differ depending on the trade. Please select the appropriate wage hour type. The wage hour type <u>must</u> be selected so that the hourly booking is displayed correctly.

The StLV / Item Key field is also linked to the wage hour type. Depending on the order call-off and the selected wage hour type, the StLV or the item key is used automatically.

The surcharge periods must also be selected under wage hour type.

External

6.4.3 StLV / Position key

The purchase order retrieval is linked to the wage hour type and also to the StLV / Item Key field. Depending on the order call-off and the selected wage hour type, the StLV or the item key is automatically inserted or at least preselected.

If there is no link to the order call, a manual selection must be made.

The item key can be seen from the standard bill of quantities (StLV).

This must first be used to select a StLV and then a position key. The magnifying glass only appears if a number is stored in the Order retrieval field. The StLV and position key are related to this.

6.4.4 Start and end

The times must be entered for correct billing. These can be selected manually or via ... With ... can be set the selected time by 15 minutes forward or backward.

External

6.4.5 Break time

Break time must be entered for correct billing.

Legal regulations must be observed. The value of the break time must be entered as a decimal number - machine hours. For example, 0.25 hours = 15 minutes, and so on.

For breaks greater than 1 hour, please enter manually.

6.4.6 Deduction of the waiting period

The waiting time is automatically deducted depending on the selection of the trade*. The unremunerated waiting time (based on the trade-specific agreements) is only automatically displayed and deducted when saving or signing. Before that, a line with waiting times must first be selected under Wage hour type.

*For the trades "Other services at the company" and "Other services at the specialist office", the deduction of the waiting period must be entered by the user.

6.4.7 Hours for billing

Create automatically, depending on how the fields were filled in before.

The whole line is deleted. The line is copied to if another line is available under.

External

6.4.8 Surcharge times (work on Saturdays or Sundays and public holidays)

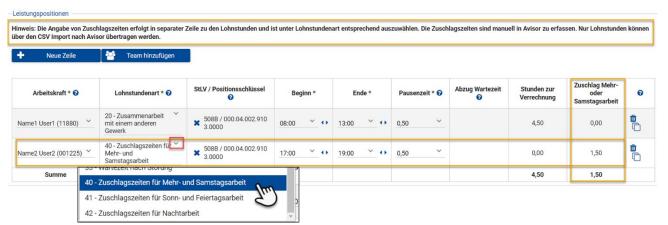

Important!

Only wage hours can be transferred to Avisor via the CSV import.

The surcharge times are to be entered manually in Avisor.

Select the desired type of surcharge under "Wage hour type" and enter hours.

In the case of the surcharge time for night work, there is an automatic validation as to whether the time entered is between 10:00 p.m. and 6:00 a.m.

Save/submit proof of achievement.

There are only wage hours in the CSV files (CSV: Comma separated value = > file type that is automatically sent to the contractor by e-mail and can be imported into Avisor).

In the PDF file, everything can be seen on the transcript of records.

External

The surcharge times are to be entered manually in Avisor!

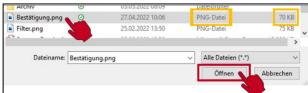

6.5 Attachments

Press Upload Attachment.

Please add the DigiTi ID to the file name of the attachments (e.g. 2022_001234-1_meinAnhang.xls).

Select File.

Note:

Attachment must be a Word, Excel, Power Point, PDF or image file and must not exceed 10 MB!

File is attached, can be opened or removed via 🗓 . Or other files can be attached.

Re	evision: 1.7	Status: 19.04.23	File: DigiTi Handbuch Kontraktoren_EN.docx	Side: 41 from 59

External

6.6 Signatures

How many signatures are to be made is displayed in the signature field, depending on the selection in the header data

: e.g. insulation trade, VT or PCT has been selected and employees have been entered on site.

See chapters: Signature process (workflow) depending on the selection of the trade

6.6.1 Contractor Signature

Contractor confirms his entries on the proof of performance by pressing the "Sign" field.

Signature has been inserted. Fields of the transcript of records can no longer be edited.

Now there are three options:

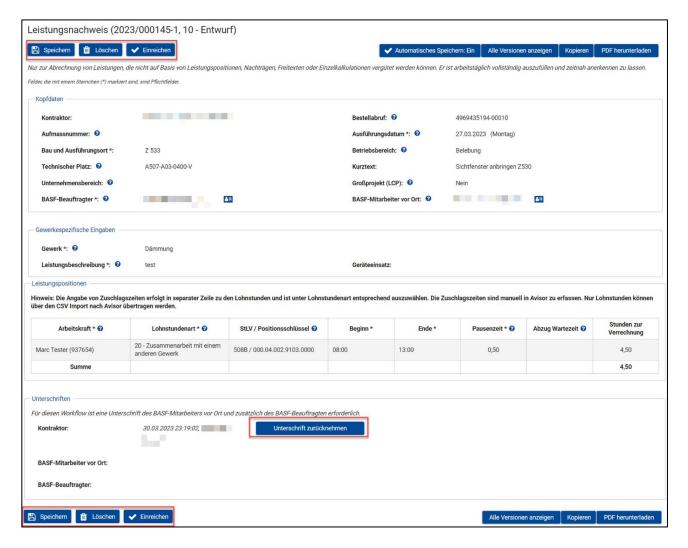

Revoke signature: Fields of the transcript of records can be edited again.

Save: Proof of performance remains in the "Draft" status with the contractor.

External

Submit: Proof of achievement is sent to the next approver according to the workflow.

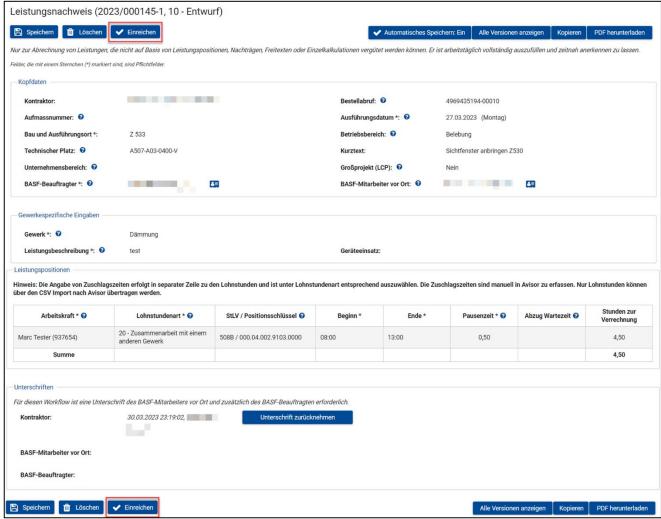

External

7 Submit proof of achievement

Send proof of achievement via "Submit" to the next approver in the workflow.

Proof of achievement successfully submitted

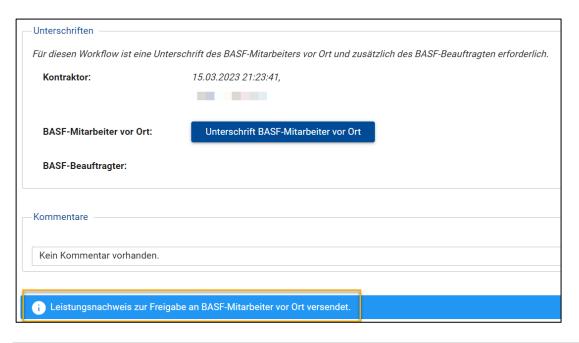

Leistungsnachweis (2023/000106-1, 20 - Eingereicht)

View in the performance record if the BASF employee is to sign on site:

External

7.1 Revoke proof of achievement

The proof of performance could be processed again by the contractor until the certificate is released. For this purpose, the proof of performance must wideruse be revoked via the button. As a result, the proof of performance can be corrected by the contractor. The signature process will begin again when the proof has been resubmitted.

A reason must be given.

External

If the proof of performance is revoked by BASF after approval, the submitter will receive the following information e-mail:

The BASF employee could now insert, reject or reject a comment. The contractor could also revoke this proof of performance now so that he can process the certificate.

7.2 Proof of Achievement Number

The proof of achievement number is only generated once **it has been** saved **or** submitted.

Automatisch generierte, fortlaufende Nummer

8 Edit / correct proof of achievement

In the "Draft" status, the transcript of records can always be edited:

External

Proof of achievement can be signed in the "Draft" status. For a new processing, the "signature withdrawn" must be revoked.

Unterschriften —			
Für diesen Workflow ist eine Unterschrift des BASF-Beauftragten erforderlich.			
Kontraktor:	23.03.2023 20:36:19,	Unterschrift zurücknehmen	
BASF-Beauftragter:			
Speichern Lösch	en V Einreichen		

If the proof of performance has been submitted, it could be processed again by the contractor until the certificate is released via "Revoked". See chapter *Revoke proof of achievement*

8.1 Different statuses of the transcript of records

Explanation of the different statuses in the transcript of records:

No.	Status	Meaning
10	Draft	New transcript of records has been opened and saved. You can use it to create some templates and leave them in the draft. If necessary, duplicate and change the bill by copying.
20	Submitted	Proof of performance was forwarded by the contractor to the next approver.
21	Corrected	Proof of performance has been improved by the contractor after it has been submitted and either • has been revoked and submitted by the contractor, or • has been rejected by BASF or • the authorisation period had expired.
30	1. Signature is made	Proof of achievement was signed by the first approver. The second signature is still pending approval.
40	Released	The proof of performance has been signed by all approvers and is therefore released and can be offset.
45	Recorded in Avisor	The proof of performance was recorded in Avisor. This status can only be achieved if a valid order retrieval and StLV / item key have been selected on the proof in DigiTi. The interface between Avisor and DigiTi is updated hourly.
50	Settled in Avisor	The proof of performance was settled in Avisor. The interface between Avisor and DigiTi is updated hourly.
60	Approval period expired	The approval period of 96 hours after submission is over. The approver can still edit the bill. After consultation, the contractor can register someone else as a BASF representative or BASF employee on site and resubmit the certificate.
61	Rejected	BASF rejected the proof of performance. In the comment field, the reason for the rejection is described.
90	Revoked by contractor	After it was submitted, the proof of performance was withdrawn by the contractor, i.e. the submission was revoked. Now the

L	Revision: 1.7 Status: 19.04.23	File: DigiTi Handbuch Kontraktoren_EN.docx	Side: 47 from 59
---	---------------------------------------	--	------------------

External

		contractor can process and submit the certificate again. The signature process starts again.
		This is only possible as long as the note does not have the status "Released".
91	Revoked by BASF	After it was released, the proof of performance was withdrawn by BASF, i.e. the release was revoked. Contractor receives an e-mail for information. Now the contractor can process and submit the certificate again. The signature process starts again. Before the contractor submits again, the BASF employee can reject or reject the certificate with justification. This is only possible as long as the note does not have the status "Settled in Avisor".
92	Declined	The proof of performance was rejected by BASF with justification. The certificate can only be copied by the contractor and thus recreated.
93	Cancelled in Avisor	The proof of performance has been cancelled in Avisor. The certificate must now also be revoked by BASF and, if necessary, revoked. may be rejected or rejected on grounds of the case.

8.2 Copy transcript of records

A created performance record can be copied at any time in any status.

Please pay attention to the entries that need to be adjusted, such as the execution date. If the note has been duplicated and there is information in another note, the following message appears:

In the role under contractor profile "Full access to own notes", all notes in the status "Draft" can be viewed and copied. This can also be used as a template. If, for example, the bills are released, it is no longer possible to copy, because, for example, the mentioned role only sees its own bills.

8.3 Proof of performance "Approval period expired"

The status "Approval time expired" can occur in all trades if the certificate has not been processed by the next approver for 96 hours after submission.

After the contractor has submitted the proof of performance, the next approver (BASF employee on site or BASF representative) will receive two reminders or his representative will also receive a reminder within 72 hours if there is no response. After 96 hours after submission, the certificate will be returned to the contractor with the status "Approval time expired". The contractor can now select another employee on site or BASF representative. In this regard, please consult with the company or BASF representative to see who can confirm the proof of performance. The contractor must resubmit it.

The BASF representative or BASF employee on site can still process the certificate.

See also chapter Signature process (workflow) depending on the selection of the trade

8.4 Proof of achievement "rejected"

After proof of achievement is rejected, it has the status "Rejected".

Via "Correct", you can edit and change the certificate again. After that, the certificate can be resubmitted.

If the certificate was rejected in Avisor because something was wrong with the DigiTi certificate, it must also be retrieved in DigiTi by the BASF representative and, if necessary, rejected.

Revision: 1.7 Stat	tus: 19.04.23 File: Dig	iTi Handbuch Kontraktoren_	_EN.docx	Side: 49 from 59
--------------------	--------------------------------	----------------------------	----------	------------------

External

8.5 Proof of achievement "Rejected"

After proof of achievement is rejected, it has the status "Rejected".

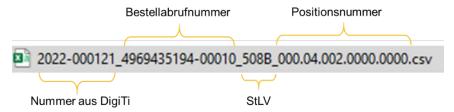

This certificate of achievement can "only" be copied and is thus created "new".

9 Proof of performance in Avisor using a CSV file

Transfer shared proof of achievement to Avisor with the help of the CSV file. CSV (Comma separated value) file type that is automatically sent to the contractor by e-mail and can be imported into Avisor.

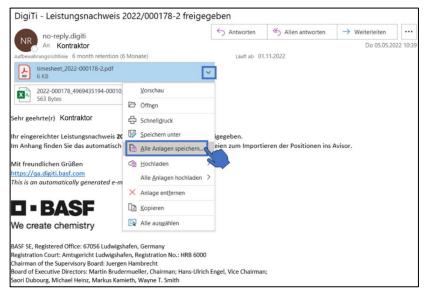

Description of the CSV number:

1.) Store required documents such as CSV file(s) and PDF on the computer. All documents for the approved proof of achievement are attached by e-mail.

External

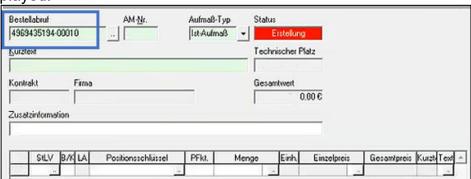

2.) Or in the DigiTi PDF and CSV can be downloaded in the released proof of achievement.

Create a new document in the notification

Enter the order call number. Confirm with the "Enter" key. Entries of the order call-off are displayed.

To add the DigiTi ID in Avisor:

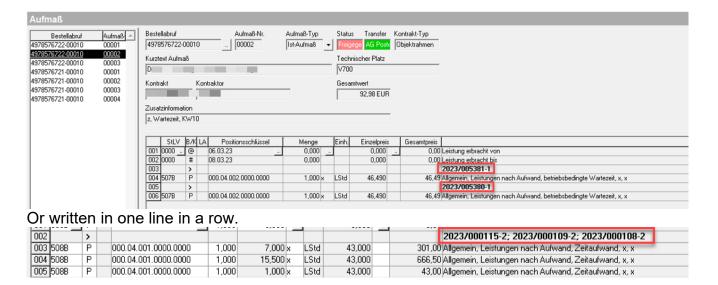

For further processing, it is necessary to enter the DigiTi ID number in Avisor.

Please add an extra line of text in Avisor: DigiTi ID: "202x/xxxxxx-x"

	Revision: 1.7	Status: 19.04.23	File: DigiTi Handbuch Kontraktoren_EN.docx	Side: 51 from 59	l
--	---------------	------------------	--	------------------	---

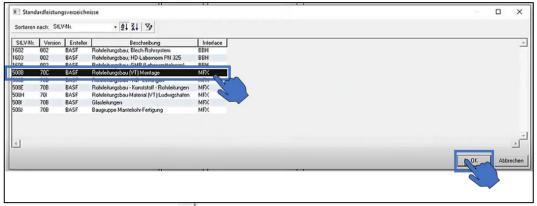

External

If there are several performance records in one order call-off, a PDF can be combined. See chapters: *Merge and download transcripts of records (PDF)*.

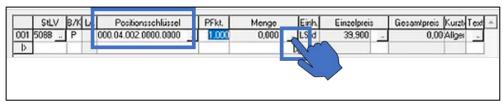

Select the StLV number and confirm with "OK".

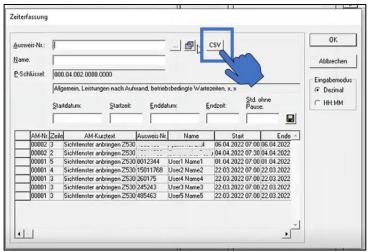

Enter the item key and select it under Quantity.

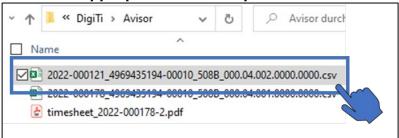

External

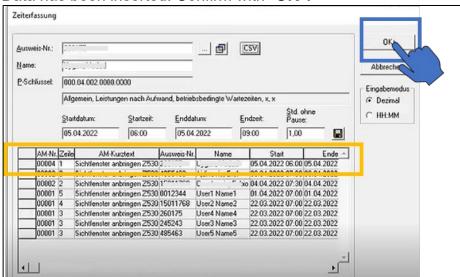

Select CSV.

Select the appropriate file and open it.

Data has been inserted. Confirm with "OK".

The CSV file is created for each item key. This can also involve and transfer multiple workers.

External

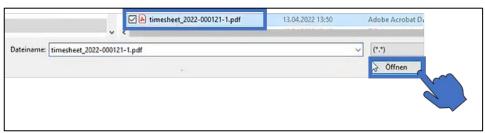

In case of error messages, please check that there are no blank lines in the CSV import or that you have not inserted any manually. These would have to be deleted.

<u>Attention</u>: Surcharge items and other service items must be entered / supplemented manually (as before). Only wage items (in the LStd unit) can be transferred via CSV.

Insert PDF file under Attachments

Select and open file

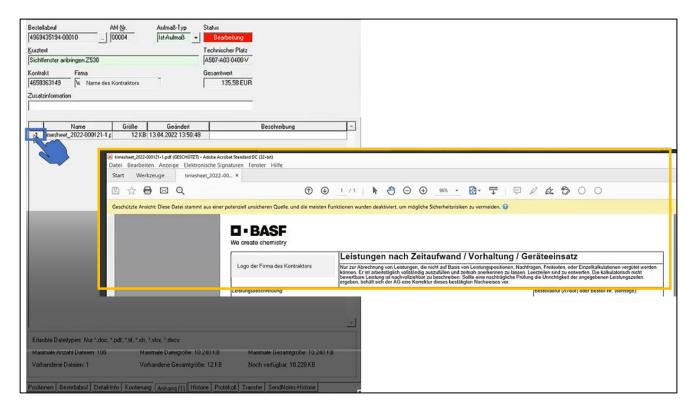

Annex inserted

Open PDF attachment under Select attachment and select position 1.

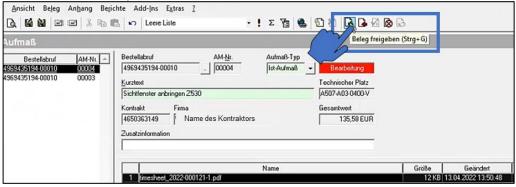

External

Make sure that the DigiTi ID number is entered in Avisor. Please add an extra line of text in Avisor: DigiTi ID: "202x/xxxxxxx-x"

Click "Yes" to confirm the amount.

External

Editing completed.

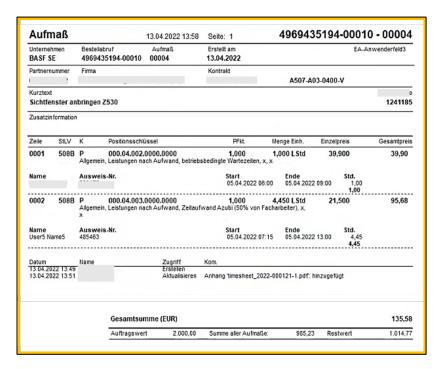

Send the measurement to BASF as usual.

The document can be viewed under page view.

Make report selection.

External

10 Action notifications by e-mail

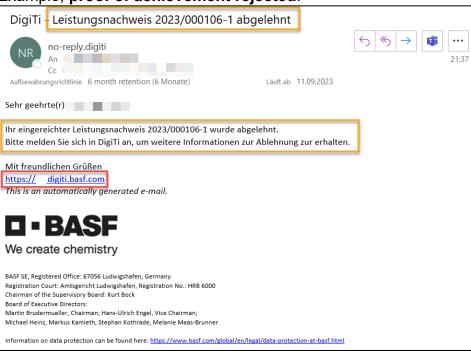

If a certificate of achievement has been rejected, rejected or approved, the contractor will receive an e-mail.

It shows what proof of performance is involved and what action is required for the contractor.

Example, proof of achievement rejected:

Example, proof of achievement rejected:

External

Example, proof of achievement released:

11 Logging out of DigiTi

Automatic logout occurs after 12 hours.

Log out via the "Logout" button in the top bar.

12 Help and further information

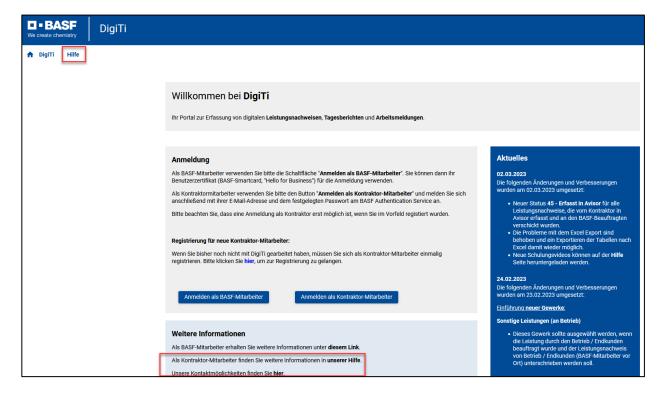

For process arrangements, please contact your responsible BASF representative or representative. Your installation coordinator / specialist office.

Feedback on the DigiTi application under the e-mail: digiti mailbox@basf.com

For more information, please visit the DigiTi homepage (https://digiti.basf.com)

External

Or at the BASF Info Center for contractors at the Ludwigshafen site

Here's how to get access to the Action Center:

If you already have access to the BASF regulations in the <u>Global Technical Extranet</u> (<u>LINK</u>), you will also be taken to the Infocenter. If you need access, please contact your BASF representative.

13 After the pilot phase

From 01.08.2023, the BASF IS Service Desk can be contacted at 0621-60-77577 in case of problems or malfunctions.

If the contractor contacts the BASF IS Service Desk and does not yet have a BASF e-mail address (@partners.com), the BASF representative or assigned mentor from contractor management at EST/CC should be named as a contact person in the ticket.
